DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 14-16 in the reply filed on 4/21/2005 is acknowledged.

Specification

2. The specification is objected to because numerous locations throughout the specification have used the units "NC," yet no definition thereof can be found. See at least pages 7-9, 33, 37, 62, Table 18, abstract.

Claim Objections

3. Claim 16 is objected to because improper Markush phrasing has been used. The word "and" should be inserted following "ethylene". It would appear that a comma should be added after "olefin."

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1713

5. Claims 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) In claim 14 (and claims 15-16 by dependency), the scope of "MI" cannot be determined because the claim does not state the test conditions.

(b) In claims 14 and 15 (and claim 16 by dependency), the phrase "propylene sequences" is indefinite because the claim does not indicate the monomer length for determining a "sequence". Iso- and syndiotacticity in olefin polymers is measured by determining the orientation of neighboring monomer units (i.e., meso or racemic); however, essential to such measurements is a definition of the sequence length, i.e. 2 (diad m or r), 3 (triad mm or rr), 4 (tetrad mmm or rrr) or 5 (pentad mmmm or rrrr). Therefore, the limitation requiring 40% isotactic or syndiotactic orientations is unclear without an indication of the sequence length.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagawa et al. (EP 870 794).

Art Unit: 1713

The reference shows in Production Example 1 the synthesis of a 40% crystalline propylene/butene copolymer comprising 76% propylene in the presence of a metallocene catalyst, and having a MI of 20 g/10min. The polymer is then used as a component in a hot melt adhesive layer in a laminated film composition.
